Education

B.Sc. in Computer Engineering 2024-2028 (exp)
Khatam University, Tehran, Iran

High School Diploma 2021-2024
National Organization for Development of Exceptional Talents – NODET, Tehran, Iran

- Diploma GPA: 18.58 / 20

Research Interests

- AI Agents and Agentic AI
- Multimodal AI Systems
- Long-Term Memory
- Human-AI Interaction
- Vision-Language Models
- Reinforcement Learning

Publication

- Modeling Player Engagement under Goal Assignment Uncertainty** 2026–Present
(In Preparation)
R. Adousi, H. Khorram, S. Kamkar

Experience

Research Assistant — Human-Computer Interaction & Game AI Research 2025 – Present
Khatam University, Tehran, Iran
Under supervision of Dr. Shiva Kamkar

Teaching Assistant — Introduction to Computer Science and Programming Spring 2026 – Present
Khatam University, Tehran, Iran

Skills

- Programming:** Python, C++, Flask, TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy
- Research Methodology:** Study Design, Scientific Writing, Statistical Analysis, Data Preprocessing
- Soft Skills:** Teamwork, Problem Solving, Critical Thinking, Self-Learning
- Language Skills:** Persian (Native), English (Advanced), German (Intermediate)

Selected Projects

- Scientific Paper Analyzer — Multi-Agent AI Research Assistant | Summer 2026**

Developed a multi-agent AI system for scientific paper analysis using Google ADK and Gemini, enabling automated summarization, structured report generation, and human-in-the-loop review with secure MCP-based tool integration.

- **RateMyProf — AI-Powered Professor Rating Platform | Winter 2025**

Developed a full-stack professor review platform with authentication, database-backed review management, and AI-generated review summarization using Flask, SQLAlchemy, and Hugging Face models.

- **Sentiment Analysis with Machine Learning and LLM (DistilBERT) | Fall 2025**

Built a sentiment analysis model combining SVM, Logistic Regression, and DistilBERT using stacking ensemble.

- **Personal Website | Fall 2025**

Created a personal website using HTML, CSS, JavaScript, and Bootstrap as part of CS50X "Homepage" project.

- **Housing Price Prediction in Tehran | Fall 2025**

Built a machine learning model to predict housing prices in Tehran using regression techniques for educational purposes.

Selected Honors and Awards

- **Ranked 9th in “Algorithm LevelUp” Competition | Quera | Aug 2025**

Placed 9th among 135 participants in an algorithmic problem-solving contest (C++, Python).

- **Awarded FANAP Distinguished Scholarship | Fall 2024**

Recognized as a top-performing Computer Engineering student, achieving **3rd rank** in the university, based on academic excellence.

- **Recognized in Iranian National Computer Olympiad – Second Round Qualifier | Spring 2022**

Selected among the **top 0.2%** of ~10,000 participants nationwide to advance to the second stage.

- **National University Entrance Exam | 2023**

Ranked within the **top 2%** of ~128,362 applicants in the nationwide undergraduate entrance exam for Iranian universities.

Selected Certifications & Technical Training

- **Machine Learning Specialization – DeepLearning.AI / Stanford University | 2026**

Supervised ML, regression, classification, model evaluation, regularization.

- **Neural Networks: Zero to Hero – Andrej Karpathy | 2026**

Hands-on implementation of neural networks and GPT-style language models from scratch using Python and PyTorch.

- **CS50X – Harvard University | 2025**

Computer science fundamentals, web development, databases, and full-stack project development.

- **IAAA (Iran's Annual Artificial Intelligence Award) | 2025**

Completed a comprehensive AI course covering Python, ML/DL, data science, image processing, and mathematics for AI.

- **“AI & Data Engineering” – Fanap Campus | 2024**

Completed a hands-on AI and data engineering program with multiple projects.

- “Data Structures & Algorithms”: 19/20
- “Theory of Languages and Machines”: 20/20
- “Differential Equations”: 19.5/20
- “Advanced Programming”: 20/20
- “Probability & Statistics” : 20/20

Extracurricular Activities

- **Startup Project – Paint by Numbers**
Developing a program that converts images into paint-by-number templates for artistic creation.
